To Whom It May Concern:

**RE: MNL Partnership with eSCRIBE related to Digital Meeting Management Solutions**

Municipalities Newfoundland and Labrador (MNL), recognizes that municipalities are exploring digital opportunities to improve interactions with citizens while driving operational efficiencies for municipal staff.

We believe that eSCRIBE has a demonstrable history of providing meeting management solutions to municipalities across Canada to help save time, lower costs, and increase stakeholder engagement; we are pleased to partner with them to offer all Newfoundland and Labrador municipalities secure, cloud-based, paperless meeting management and livestreaming solutions that reduces resources required to support meetings, allowing staff to focus more on serving residents.

Over the years, eSCRIBE has taken on an important role in supporting legislative standards and procedures in some Canadian provinces that form the foundation of many municipal meetings, as well as considerations such as data sovereignty and privacy regulations. eSCRIBE's solutions are also compliant with accessibility standards such as AODA and WCAG 2.0. That is why MNL is pleased to partner with eSCRIBE. Through future MNL-eSCRIBE outreach, hundreds of municipal staff and elected officials will become better educated about eSCRIBE's meeting management and livestreaming solutions.

As your municipality digitally transforms, we hope you will consider digital meeting management and livestreaming solutions so you can be more efficient, accessible and transparent.

Should you have any questions about MNL's partnership with eSCRIBE please contact Bradley Power, Director of Programs at 709-753-6820 or by email at [bpower@municipalnl.ca](mailto:bpower@municipalnl.ca).

Sincerely,
